INTRODUCTION TO PLANT PROMOTER

Condition: New. Publisher/Verlag: LAP Lambert Academic Publishing | Plant genetic engineering is one of the upcoming fields of study in which plants can be manipulated at genetic level for betterment of mankind. This field of science possesses a high importance in pharmaceutical industries, nutraceutical industries, agricultural productivities and many more. Production of enzymes, proteins and even the growth of plant can be regulated by constructing a suitable vector. The vector includes the regulatory sequence i.e. promoter for the optimal expression...
