

## Mining and Materiality: Neolithic Chalk Artefacts and Their Depositional Contexts in Southern Britain

By Anne M. Teather

ARCHAEOPRESS, United Kingdom, 2016. Paperback. Book Condition: New. 290 x 205 mm. Language: English . Brand New Book. In this book Anne Teather develops a new approach to understanding the Neolithic flint mines of southern Britain. These mines include some of the earliest - and also some of the largest - monumental constructions that transformed the landscape of Britain during the period of social change that accompanied the transition from foraging to farming 6000 years ago. Yet the sophisticated architecture of these mines and the unique deposits that they contained have received relatively little attention from archaeologists. This book draws together the results of an extensive analysis of archival records and material to illustrate how these mines and the activities that took place in them can be seen as integral to Neolithic life. Previous studies of the flint mines have focused on the functional demands of flint extraction and the ways in which the raw flint material was distributed and processed into tools such as axes. Yet there is compelling evidence that the voids - shafts and galleries created through the process of flint extraction - were not merely the abandoned features of flint exploitation but instead should be seen...
