V. 243. 8. 5 o.312 o.016 A Text-book Of Astronomy. By George C. Comstock, Director of the Washburn Observatory and Professor of Astronomy in the University of Wisconsin. D. Appleton and Company, New York. 391 pages. Cloth. \$1.30. Written in simple, clear, and concise language, illustrated by appropriate and well-constructed figures, made interesting by apt and homely comparisons and useful by numerous and well-chosen exercises, this book forms a welcome addition to the list of elementary text-books of astronomy. Professor Comstock has written a new book, and has not merely rearranged the material of earlier ones. His purpose is clearly outlined in the first paragraph of the preface: -- The present work is not a compendium of astronomy or an outline of popular reading in that science. It has been prepared as a text-book, and the author has purposely omitted from it much matter interesting as well as important to a complete view of the science, and has endeavored to concentrate attention upon those parts of the subject that possess special educational value. From this point of view matter which permits of experimental treatment with simple apparatus is of peculiar value and is given a prominence in the text beyond its just due in a well-balanced exposition of the elements of astronomy, while topics, such as the...
